

Helping Children Cope

Your children may respond differently to an outbreak depending on their age. Below are some reactions according to age group and the best ways you can respond:

Age Group	Reactions	How to Help
Preschool	Fear of being alone, bad dreams Speech difficulties Loss of bladder/bowel control, constipation, bed-wetting Change in appetite Increased temper tantrums, whining, or clinging behaviors	Patience and tolerance Provide reassurance (verbal and physical) Encourage expression through play, reenactment, story-telling Allow short-term changes in sleep arrangements Plan calming, comforting activities before bedtime Maintain regular family routines Avoid media exposure
School-Age (ages 6-12)	Irritability, whining, aggressive behavior Clinging, nightmares Sleep/appetite disturbance Physical symptoms (headaches, stomachaches) Withdrawal from peers, loss of interest Competition for parents' attention Forgetfulness about chores and new information learned at school	Patience, tolerance, and reassurance Play sessions and staying in touch with friends through telephone and Internet Regular exercise and stretching Engage in educational activities (workbooks, educational games) Participate in structured household chores Set gentle but firm limits Discuss the current outbreak and encourage questions. Include what is being done in the family and community Encourage expression through play and conversation Help family create ideas for enhancing health promotion behaviors and maintaining family routines Limit media exposure, talking about what they have seen/heard including at school Address any stigma or discrimination occurring and clarify misinformation

Age Group	Reactions	How to Help
Adolescent (ages 13-18)	Physical symptoms (headaches, rashes, etc.) Sleep/appetite disturbance Agitation or decrease in energy, apathy Ignoring health promotion behaviors Isolating from peers and loved ones Concerns about stigma and injustices Avoiding/cutting school	Patience, tolerance, and reassurance Encourage continuation of routines Encourage discussion of outbreak experience with peers, family (but do not force) Stay in touch with friends through telephone, Internet, video games Participate in family routines, including chores, supporting younger siblings, and planning strategies to enhance health promotion behaviors Limit media exposure, talking about what they have seen/heard including at school Discuss and address stigma, prejudice and potential injustices occurring during outbreak

Additional Help

If you or a loved one is having a difficult time coping with the outbreak and want to seek outside help, there are ways to get that help. For example:

- Get support regarding your anxiety or stress by speaking to a trained counselor at SAMHSA Disaster Distress Helpline at 1-800-985-5990 or by texting TalkWithUS 66746.
- Contact your physician or your insurance company (if they have a consultation line) to ask health-related questions or to seek mental health support.
